

## Academic progress for kids in grades K-8

### Customized Programs

Your child's Kaplan Tutoring program begins with an assessment. Then, our revolutionary Smart Track system integrates information from your child's personal tutoring and online sessions to create a constantly updated, customized learning plan. Our exclusive Homework Support System even tailors your child's curriculum to tonight's homework or next week's test. This ensures that your child is making the fastest progress possible. Because our curriculum is aligned with the most recent state standards, your child will always be working on the most relevant skills.

### Expert Tutors

Kaplan tutors are selected for their academic expertise, educational experience and ability to engage kids. All of our tutors are college graduates and are required to complete our comprehensive Tutor Certification Program. We ensure that your tutor will be both a subject matter expert and a pro at motivating your child. We'll work with you to find the most convenient tutoring schedule for you and your child.

### Unlimited Online Sessions

Your child will have unlimited access to our adaptive online curriculum with more than 1,000 hours of instruction. Our online characters will guide your student through new skills and engage your child with the learning process. Our rewards program keeps students motivated and focused on their academic progress.

### Real-Time Progress Reports

Every time your child finishes a session, you'll be able to view progress reports online through your secure parent account. You'll see what your child mastered, what's difficult and what's in progress. We will also keep you up to date through check-ins and parent conferences.

*Proven Results – For more than 70 years, Kaplan has delivered academic results for students. Your child's progress is our priority.*
